

MUHAMMAD HAMZA

Full-Stack Developer — AI Engineer

Islamabad, Pakistan — +92 307 5865977 — enigjes@gmail.com
hamza-fullstack-portfolio.vercel.app — github.com/hamzanisar929

SUMMARY

Full-Stack Developer and AI Engineer with 2+ years of experience building scalable SaaS products, AI applications, REST APIs, and automation systems. Skilled in React, Next.js, TypeScript, Node.js, Python, databases, LLMs, RAG, and AI integrations.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++, HTML5, CSS3

Frontend: React.js, Next.js, Vite, Tailwind CSS, Framer Motion, Redux, Responsive Design, WebSockets

Backend: Node.js, Express.js, REST APIs, Webhooks, Socket.IO, JWT, Authentication, Microservices, API Integration

Databases & Infrastructure: PostgreSQL, MySQL, MongoDB, Redis, Supabase, Prisma, TypeORM, Sequelize, Docker, Git, GitHub, Vercel, Postman

AI/ML: OpenAI API, LLMs, RAG, AI Agents, Prompt Engineering, Vector Embeddings, Semantic Search, LangChain, NLP, Voice AI, Scikit-learn, Pandas, NumPy

Systems: Distributed Systems, Queue-Based Processing, Real-Time Systems, Database Design, Automation, Third-Party APIs

EXPERIENCE

AI Engineer — Wayfind Solutions

Islamabad, Pakistan

Oct 2025 – Jul 2026

- Architected and shipped AI-powered SaaS products using Next.js, React, TypeScript, Node.js, PostgreSQL, MongoDB, Redis, OpenAI APIs, and LLM workflows.
- Solely developed **Auta**, an Instagram DM automation SaaS using Graph API, webhooks, background processing, and scalable backend services, reducing manual messaging workload by approximately **65%**.
- Built **Meet AI** and **Streamify**, implementing real-time communication, recording, transcription, AI summaries, analytics, video processing, workspace management, and collaboration workflows; improved processing efficiency by approximately **35–50%**.
- Engineered **Voice of Humans** and **DentAI**, integrating LLM, voice-processing, contextual conversation, session memory, and AI recommendation workflows for conversational applications.
- Developed **Build Estate** and **Real Estate AI**, implementing AI-assisted property search, semantic matching, recommendations, structured data processing, and automated real-estate workflows; reduced manual property filtering by approximately **60%**.

Full-Stack Developer — Servicsters

Islamabad, Pakistan

Aug 2024 – Aug 2025

- Developed production web applications using React, Next.js, Node.js, Express.js, TypeScript, MySQL, REST APIs, and third-party integrations.
- Designed and implemented a **WhatsApp Business API backend** supporting templates, media messaging, bulk messaging, scheduling, webhooks, token management, chat history, and queue-based processing.
- Developed **VUCA Max** backend services including REST APIs, database workflows, authentication, and frontend integrations.
- Integrated **Sabre APIs** for automated form workflows and Halasky travel-data services, connecting external platforms with internal application infrastructure.

SELECTED PROJECTS

Project portfolio continued on page 2 in current showcase order.

EDUCATION

B.S. Computer Science

Sept 2023 – Present

Sir Syed CASE Institute of Technology, Islamabad, Pakistan —

Expected Graduation: Sept 2027 —

GPA: 3.95 / 4.00

AWARDS & CERTIFICATIONS

- Campus Sustainability Champion – 2025
- Top Performer in Coding Challenges – 2024
- Full-Stack & Frontend Certifications – Udemy

MUHAMMAD HAMZA

SELECTED PROJECTS

Orchestra - Visual AI Workflow Platform

Built reusable AI-agent, knowledge, integration, and workflow orchestration features, reducing application setup time by approximately 60%.

WACRM - Customer Relationship Platform

Developed contact, deal, broadcast, and automation workflows, improving customer follow-up efficiency by approximately 45%.

Nodebase - Visual AI Automation Builder

Engineered node-based workflows connecting AI models, APIs, forms, and triggers, reducing integration development time by approximately 50%.

Voice of Human - Real-Time Voice AI Platform

Integrated speech recognition, LLM responses, voice synthesis, and session memory, reducing conversational response latency by approximately 40%.

Wayfind CRM - Lead and Sales Management Platform

Built lead, contact, deal, activity, and reporting workflows, improving sales tracking efficiency by approximately 45%.

Meet AI - AI Meeting Platform

Built meeting, recording, transcription, and AI-summary workflows, reducing manual documentation effort by approximately 70%.

Auta - AI Instagram Automation SaaS

Built event-driven Instagram DM automation using Graph API and webhooks, reducing manual messaging workload by approximately 65%.

Streamify - AI Video Collaboration Platform

Optimized video upload, recording, processing, and workspace workflows, reducing processing latency by approximately 35%.

Lemon AI - Social Media Planning Workspace

Developed AI-assisted writing, scheduling, and content-calendar workflows, reducing content planning time by approximately 55%.

DentAI - Conversational AI Dental Assistant

Developed contextual text and voice interactions with session memory, reducing patient query-handling time by approximately 55%.

POS Biotin - Pharmacy Operations Platform

Implemented sales, inventory, product, and reporting workflows, reducing manual stock-tracking effort by approximately 50%.

Build Estate - AI Property Discovery Platform

Implemented semantic property matching, recommendations, and structured data workflows, reducing manual property filtering by approximately 60%.

Safa Cafe - Restaurant Ordering Experience

Developed responsive menu, promotion, and ordering flows, reducing customer ordering steps by approximately 40%.
